HANSAFORM

NICE ON THE EYES.
GOOD FOR THE ENVIRONMENT.

A CLEAR LINEAR DESIGN STATEMENT.

HANSAFORM.

QUALITY Excellent longevity, greatest satisfaction.
GREEN RESPONSIBILITY Technologies for the future.
SAVING WATER Every day anew.

Two, which are perfectly harmonised in form and function: HANSA**FORM** shower solutions and the HANSA**VIVA** range.

(Fig. right) Exposed solution with concealed connections.
(Fig. below) Various elegantly concealed versions and HANSA**VIVA** hand shower (height adjustable) with wall bar set.

A STATEMENT FOR TOP QUALITY.

HANSA**FORM** is not only nice on the eyes, but also provides years of enjoyment due to the functional and practical details. The particularly smooth operation offers a level of comfort which can be enjoyed every day anew. An essential detail for families with small children: the integrated hot water stop prevents the risk of scalding, while saving energy.

The minimum gap dimensions and the elegant concealed solutions are extremely easy to clean. The shine of the high quality surfaces is therefore quickly restored. Furthermore, HANSA**FORM** is very impressive due to the high quality, extremely durable materials, an excellent finish and its low water consumption.

The bathtub area, in particular, can be a real design statement in contemporary bathrooms. HANSA-**FORM** offers the ideal solution for every planning problem.

(Fig. above) Single-lever bathtub mixer as an exposed solution with integrated diverter for the HANSA-**VIVA** hand shower.
(Fig. below) The elegantly designed concealed version with diverter for the separate bathtub spout and for the HANSA**VIVA** hand shower.

THE NAME SAYS IT ALL:
HANSA**FORM**.

The name HANSA**FORM** says it all. With this new range, the exciting combination of geometrical shapes and surfaces defines a completely novel design form. Upright and confident, HANSA-**FORM** has one believing that it is truly proud of its inner qualities. The materials, finish and technology are state-of-the-art.

Half is enough. We therefore have a special sense of responsibility for the precious resource with which we work every day.
A special stream former reduces the flow rate from 12 l/min to 6 l/min for HANSA-**FORM** basin mixers. The volume of the spray has been exceptionally retained even though the actual flow rate has been cut by half.

At least one product of this range meets the specified criteria

6 l/min — Restriction of the flow rate to 6 l/min and intelligent stream formation ensure optimized water consumption with full comfort.

Extremely quiet.
Fitting complies with the strict conditions under noise protection class 1.

WATER SAFE. Hi-tech functional core.
Preserves water quality.
